EXPERIENCE

Backend Developer | *Freelance / Self-Employed*   May 2022 – Present

Built and maintained **Postways** ([GitHub](#)), a full-stack Instagram-like web application with server-rendered views and a REST API.

- Designed 20+ REST endpoints using Django REST Framework with JWT authentication, token rotation, and blacklisting.
- Implemented real-time likes notifications using WebSockets via Django Channels, eliminating page refreshes.
- Containerized the full stack (Django, PostgreSQL, Redis, Nginx) using Docker Compose for reproducible environments.
- Deployed to AWS EC2 with S3 for media storage, CloudFlare for SSL/caching, Nginx, and Daphne.
- Built CI/CD pipeline with GitHub Actions; achieved 90% test coverage using pytest.

Software Engineer (Intern) | *SoftServe, Inc.*   Jan 2022 – Apr 2022

Transitioned from the Python Backend Development training program to the production team.

- Developed backend features for a production Django application using PostgreSQL.
- Collaborated in an Agile team of 5+ developers, participating in code reviews and sprint planning.
- Managed version control workflows using Git and GitHub across a distributed team.

PROJECTS

- **UkrElection2010** ([GitHub](#)) — PHP/JavaScript political quiz app deployed on GCP Cloud Run.
- **Bubbles** ([GitHub](#)) — Python arcade game demonstrating OOP patterns.
